# Where Does All the Money Go?

**\$85.9 B GF Excludes \$5+ B for Corrections Realignment**

# Historic Per Capita State Spending

Fund Shifts, Non-General Fund Fees & Taxes, Plus Federal Funds

# Governor's Solution - Tax Increase

## Governor's Marginal Tax Rate Increases for Joint Filers (excludes Sales Tax Increase)

# Working Towards Solutions?

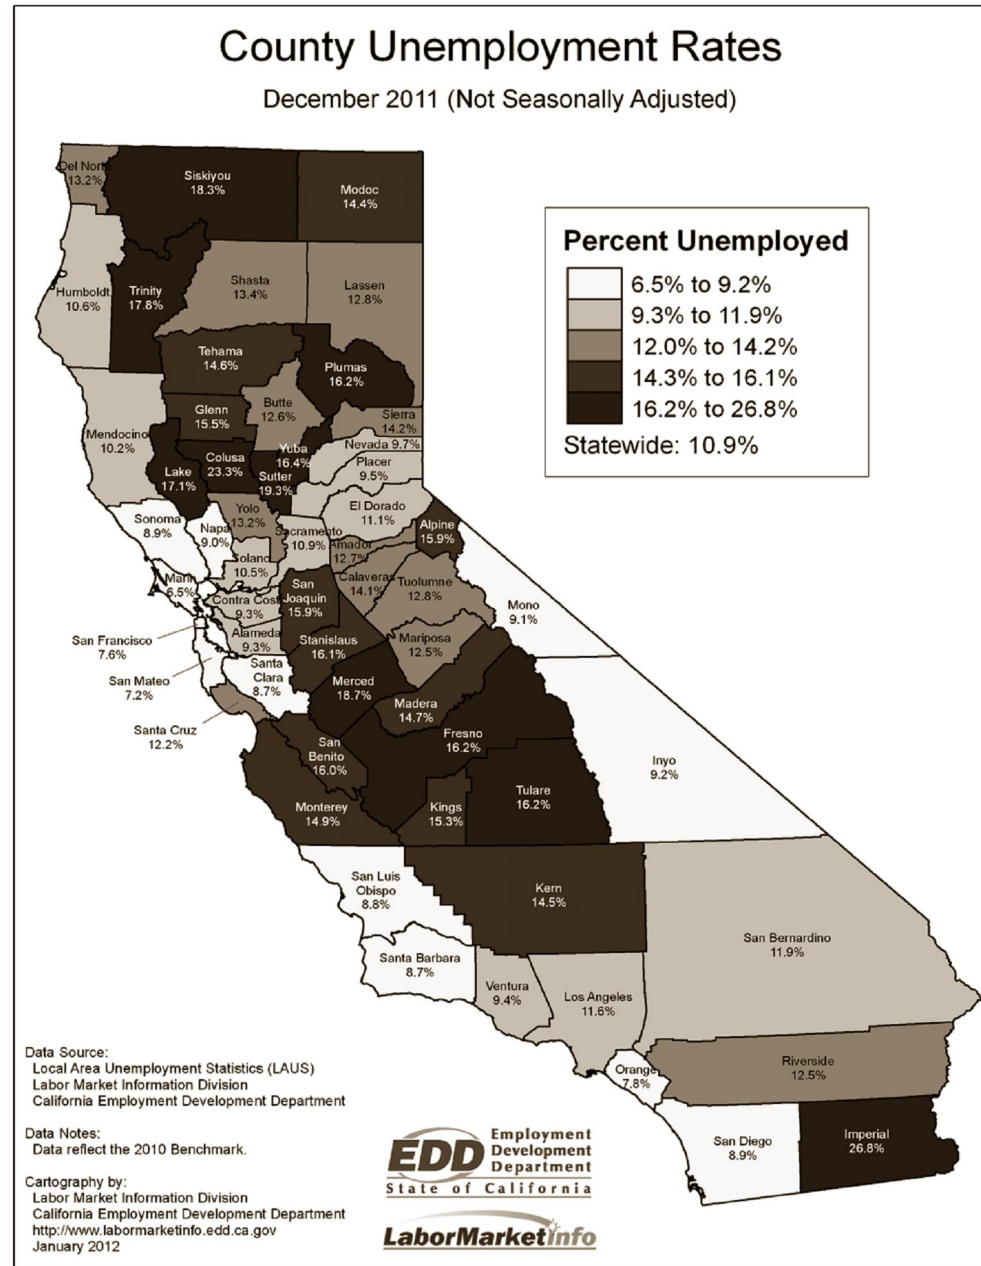

(phantom income and tax increase budget)

# The #1 Problem Unemployment

- Water Wars
- Housing & Market Crash

**#1 Solution  
Encourage  
Private Sector  
Employment**

# Large Public Works Projects CA's High Speed Fail?

- No Business Plan, Funding, Ridership, & Violates Prop1A
- Inc Debt & GF d/s
- Requires Local Tax Support
- Lots of Promises and Few Jobs
- GAO, LAO, Auditor, Staff – Lemon Law

# CARB

## To the Rescue?

### Cap and Trade

1. Rationing and allocation of free and auctioned "pollution" certificates among certain industries (oil producers, refiners, electricity generators, and other large industries producing more than 25,000 metric tons of CO<sub>2</sub> e per year)
  - Agriculture and Forestry – exempt; regulated separately
2. Auction - certificates sold to covered entities (fiat currency)
  - Quarterly auctions - current year and "vintage" allowances (used 2015 and beyond)
  - Free allowances allocation decreases (2020 GHG goal)
  - Ability to bank some allowance certificates for future
  - Secondary market for unused offset credits and derivatives
  - Initial price estimated between \$10 and \$50 per allowance; increasing over time

# We Are Getting Fleeced

- **Increases State Spending, Regulators, and Investment Bank Revenues**
- **Will Decrease Private Sector Employment**
- **State revenue difficult to ascertain; costs of production and living in CA will be higher; risk of market manipulation could be huge**
- **Wide range of revenues or losses; market manipulations and/or leakage; Sinclair nexus**
- **Assumes businesses have few choices**
- **Pollution goals could be unmet**
  - **Assumes CARB can monitor and control business losses; increase the price of energy; hold down costs for consumers; control market manipulations; protect local municipalities; hire WCI, Inc to help?**
  - **Distributors of Energy Favored over Producers**
  - **No allowance for CA company growth**

# Legislative Solutions – Increasing State Revenues

- **Split Roll Property Tax**
- **Oil Severance Tax**
- **Mandatory Single Sales Factor**
- **Tax reform = Code for Tax Increase**
  - Sales Tax – Broaden the Base (all pay?)
  - Punishing Tax Cheaters (eliminating legal deductions or tax “expenses”)
- **2012 Ballot Initiatives**
- **SB 375 Goals**

# **Saving California = Increase Private Sector Employment & State Revenues by Reducing Uncertainty**

- **Halt or Delay Cap and Trade (AB32)**
- **Delay Increasing UI tax on remaining employers**
- **Halt High Speed Rail - Focus on local infrastructure**
- **Halt Tax Increases – Restrain Spending**
- **Ensure a steady supply of water to the Central Valley and So Cal**
